

Protect your **facility**
and its **aesthetics!**

Architecturally-
enhanced high security
bollard systems.

Create the look you want...faceted, fluted,
tapered, rings and ripples, colors, pillars,
shields, emblems, logos...you decide.

Raise and lower in seconds!

Raise and lower in seconds... Bollards can be beautiful.

With Delta's revolutionary designer bollards, your first level of security will accent and enhance your architecture. Virtually unlimited in styles and aesthetics, your bollards will blend with the rest of your buildings.

You can specify having ornamental steel trim attached directly to the bollard or select cast sleeves of aluminum, iron or bronze, which slip right over the crash tube. Bollards can be galvanized for corrosion resistance, fitted with an internal warning light for increased visibility and engineered to suit high traffic volumes. If damaged, you simply slip off the old sleeve and slip on the new.

You'll see Delta designer bollards in front of the U.S. Department of State headquarters in Washington, D.C. Within days of introduction, they were selected for facilities in Paris and Berlin. By matching existing styles, local authorities were able to approve long-delayed projects.

U.S. Department of State

3 levels of protection

Not only are Delta bollards tough—they're beautiful!

Select the level of security that is required for your application. The three levels of Delta designer bollards each meet or exceed U.S. Department of Defense and Department of State certifications.

This gives you the assurance that the bollards you are employing for physical vehicle security have been tested to the highest standards for repelling terrorist attacks.

Indeed, our bollards have been tested by independent laboratories and have met the standards of the highest level of anti-terrorist barricades. They hold the highest ratings ever given to bollard systems.

Such strength is important whether you're planning to secure a military base, warehouse or parked freight trailer. Now, with their good looks, the bollards you've always wanted to use out back can also be brought out front to hold a parking spot for visiting dignitaries or protect the front lobby.

Delta Series	Certified by	Certification Level	Test Criteria	Crash Speed
DSC 720	U.S. Department of State/ U.S. Department of Defense	K12, L2	15,000 lbs. (GVW)	50 mph
DSC 701	U.S. Department of State/ U.S. Department of Defense	K8, L2	15,000 lbs. (GVW)	40 mph
DSC 800	U.S. Department of State/ U.S. Department of Defense	K4, L2	15,000 lbs. (GVW)	30 mph

Why are Delta bollards the de facto solution?

It's a fact that over 3,000 sites worldwide are protected by Delta systems. These include U.S. embassies, nuclear plants, banks, manufacturing facilities, military bases, courthouses, private companies, major airports, car and rental lots, logistics centers, palaces, private residences and many more. For over 25 years, Delta systems have been protecting some of the most important people and facilities in the world. Since 1974, Delta has been producing products and systems that promote safety and security for people

Quality!

and property. Our staff is knowledgeable and experienced.

Delta has been the leader in using Finite Element Analysis to study vehicle collisions with fixed and moveable barriers. With our database of full-scale test results, we have superb computer models that enable us to test new designs at our desktops. We're able to analyze unique situations and design products that will meet your special needs.

To obtain DOS and DOD certification, Delta bollards were tested to rigorous standards by an independent test laboratory. Full-scale crash tests, using heavily-loaded trucks, were conducted.

Not only did the bollards stop and destroy the test trucks. In each case, two of the three bollards in each tested system were fully functional—still effective barricades after massive collisions!

Delta Scientific Corporation is the world's leading manufacturer of vehicle access control equipment with three modern production facilities. Our three principal product lines are high-security vehicle barricade systems, parking control

equipment and ballistic-rated guard post booths. Delta has been engineering and manufacturing vehicle access control equipment since 1974 and provides security solutions to customers worldwide.
